Lukasz,

Global Rules:

1) If a widget box returns no data (zero pictures, numbers, etc.) then display in widget box the following text message:
"Nothing heard through the Grapevine for the date range you selected. Expand your date range to see more data."

2) All line graphs will have 6 interval ranges
- These ranges should be as equal as possible in time but will always be equal distance on graph
- If the 6 intervals do not split equally with the sleeted date range, add extra time to last interval.

3) For Competition and Social Inboxes, please make sure "Close" button is bottom right aligned and when clicked upon it closes the expanded view.

4) Competition, Social, and Review Inbox: "Expand" buttons should be centered in each row to avoid overlap on other rows. Originally, the "Expand" button was only to show up when their was a "mouse over" action on a review row.

Review Inbox:
1) Only show actual number of reviews for selected date range
2) Max number of reviews for each page is 10
3) Display "Page x of x" when more than 10 are available during the date range selected
4) "Reply to Review" should only be shown for review websites that allow manager responses. If they do not allow responses, please display "This review site does not currently allow responses." where the reply button was.
5) Please make sure the "Close" button is actually written as "Save" and is bottom right aligned and when clicked upon it saves changes made to the review and closes the expanded view.

Review Sites:
1) Needs to be HighCharts stacked bar (left to right/horizontal).
http://www.highcharts.com/demo/bar-stacked
Attached as "Bar Stacked"
Details:
- The Stacked Bar Chart should be color coded depending on the values. Positive Values should be green, Neutral Values should be yellow, Negative Values should be Red. All theses values should add up to the Total in the API. DO NOT graph the Average value in the Graph View, only in the Table View.
- Y-axis would use SiteObject inside of the API for all values: positive, negative, neutral,

total, site
- X-axis would show number of total reviews

Social Media Inbox
1) Keep the box exactly the way you have it online right now (as of June 26th). Just move the "close" button from the left aligned to right aligned.
